

Quarterly Meeting I Agenda & Meeting Notes

Thursday, January 30, 2025

1. C2TAG Introduction and Updates (Stanley Han, CENIC) 0:00-0:29

- a. Stanley Han began with a quick introduction to C2TAG, and how originally, the TAC would meet in person to foster community, which is why C2TAG will be hosting hybrid meetings every other quarter, typically oscillating between northern and southern California. Caltech has offered to host the next hybrid meeting in August, and members will be updated as this is finalized.
- b. There is now a new member section on the C2TAG website; for those who do not have access, please email engagement@cenic.org for the password.

2. Network Updates (Josh Dickman, CENIC) 0:29-25:59

- a. CENIC's Josh Dickman updated C2TAG members with network updates, hardware refresh, optical network updates, and information about CENIC's NMS.

3. DMS Presentation and Demo (Michael Gong, David Han, Philip Romero, CENIC) 25:30-1:04:52

- a. CENIC's Michael Gong, David Han, and Philip Romero led a presentation and demonstration of what happens behind the scenes when the DDOS Mitigation Service is implemented. They discuss in-depth all the tasks needed from ISO and Operations to divert traffic to a scrubber and return clean traffic.

4. Network Packet Broker Solution (Paul Murray, Stanford) 1:05:00-1:29:35

- a. Stanford's Paul Murray led a discussion on network packet broker solutions. This includes an introduction to the history of Stanford's network, and the volume of devices and traffic on this network.
